

Jared Ryan

Product-Minded Full-Stack Engineer

jaredryan.netlify.app | github.com/jaredryan | jryantennis@gmail.com | 559-348-3595

SUMMARY

Product-minded full-stack engineer with 5+ years of professional experience across enterprise and startup environments. After operating residential real estate investments, returned to hands-on product development in 2026, using AI-assisted workflows to deliver polished end-to-end software faster.

RECENT PRODUCT DEVELOPMENT

Independent Product Development | Full-Stack Product Engineer Remote | 2026-Present

- Built LPA Tracker, an AI document-intelligence demo for family offices, using Next.js, TypeScript, PostgreSQL, and Prisma to support provision review, deadlines, and tasks.
- Built Campfire, a full-stack personal reflection and goal-setting application, using Next.js, TypeScript, PostgreSQL, and Prisma to support guided journeys, habits, goals, and review workflows.
- Redesigned and modernized four existing web experiences—a recruiter-focused software portfolio, a text-heavy legal firm portfolio, and 2 browser-based video games—strengthening information architecture, responsive layouts, visual systems, interactive design, and SEO.

EXPERIENCE

Ryan Lin Real Estate Investments, LLC | Real Estate Investor & Operator Florida | 2022-Present

- Built a structured, research-driven acquisition-underwriting process for \$1M+ assets under management.
- Managed the full leasing lifecycle across 9 tenancies, building marketing and client management skills
- Oversaw substantial renovations and complex company and property operations, including entity formation, partnership agreements, contractor management, insurance claims, and financing

MANTL | Software Engineer II Remote | 2021-2023

- Owned critical frontend features and mentored 4+ engineers through PR reviews, pairing sessions, testing guidance, and UX-focused technical feedback.
- Led automated-testing adoption across 3+ teams and 150+ tests, helping increase automated coverage from 25% to 75%.
- Partnered with product, design, and engineering stakeholders to identify and automate gaps in customer onboarding and activation, reducing time to activation by 10%.

IBM | Software Engineer II (promoted from Software Engineer I) San Jose, CA / Austin, TX | 2018-2021

- Led frontend delivery with 3+ engineers through quarterly Agile cycles, coordinating architecture, estimation, and implementation, improving team velocity by 15% and estimation accuracy by 30%.
- Architected technical solutions with product and backend leads, balancing security, performance, scope, business value, and usability.
- Partnered with design early in concept development to cut the design-phase iteration cycle by 20%, and built customer-facing new-product demos

NTR | Software Engineer Remote | 2018-2022

- Partnered with a UC Berkeley professor to design and build a feedback platform used by 20+ colleges and processing 10,000+ submissions, and still expanding to this day.
- Independently developed and operated the React, Node.js, and MongoDB application for four years, owning releases, data, and production support.

SKILLS

Languages & Frameworks: TypeScript, JavaScript, React, Next.js, Node.js, HTML/CSS, SQL, Python

Data & Delivery: PostgreSQL, Prisma, MongoDB, REST APIs, Automated Testing, Docker, GitHub Actions

Product Engineering: Responsive Design, Accessibility, Web Performance, AI-Assisted Development

EDUCATION

University of California, Berkeley | B.S. Bioengineering, Computer Science Emphasis

2017
